Qualitative Feedback

VERDICT: FAIL

The candidate, Chander, failed to demonstrate any technical knowledge, communication clarity, problem-solving approach, or behavioral fit during the interview. The candidate's responses were unresponsive

and uncooperative, indicating a lack of confidence and completeness. Specific examples from the interview include the candidate's refusal to answer the initial question and their abrupt request to finish the interview. Based on this evaluation, I would not recommend hiring Chander for the React Developer position at Autodesk. The hiring recommendation is No.
